BeA LAUNCHES HAND AND PNEUMATIC CARTON CLOSING TOOLS

BeA Fastening Systems Limited, the UK's largest supplier of collated industrial fastenings, has revamped its carton closing tool range to include five new models, all of which have been designed for professional trade use with maximum power in mind.

The new range of tools, which are suitable for all types of carton packaging, is characterized by a multitude of key performance enhancing features including unsurpassed handling. The lightweight tool complete with comfort grip decreases the risk of operator fatigue and increases working efficiency and productivity. The very latest magazine technology enables quick reloading which saves further time and money. The rapid and accurate setting of staples helps provide a superior quality of finished work, whilst two nose markings allows for exact positioning of the staples.

Wider advantages include tool versatility - they use staples with two leg lengths from 15 to 18mm. The rear loading aluminum magazines have a capacity to hold up to 120 staples in one tool.

All tools are equipped with a muffler and an optional hanging ring for suspending from a balance. The durable and reliable tool design means that this tool range offers a very cost effective solution to carton closing.

“The launch of the carton closing tools has re-invigorated a previously static market,” commented Dave Meakin, UK Sales Manager, BeA Fastening Systems Limited. “The range adopts the very latest technology in order to offer many extra features and benefits which have been long awaited industry-wide.”

For literature and pricing information on the complete range of equipment and materials available from BeA contact the sales office on 0800 0935154. Alternatively, visit the web site www.bea.uk.com for further details.
