Dynamik BeA

Powered by BeA, driven longer by you

Nailing you savings of up to 33%

BeA Fastening Systems Limited, the UK's largest supplier of collated industrial fastenings, launches an innovative and dynamic range of gas fuelled systems for timber, concrete and steel fixings. With the capacity to hold a staggering 30% more gas than other leading brands, BeA's fuel cell fastening systems have the power to deliver a third more nails providing you with unbeatable value and massive savings.

The Dynamik D 90 cordless Nailer for timber fixing, which is the first of a range of tools to be produced, features a robust extra long magazine to accommodate up to 97 D-head nails ranging from 2.9 – 3.1mm in diameter and from 50-90mm in length, has a steel nose for durability and accuracy, is powered by a long life battery, has a comfortable rubber hand grip, battery-independent ignition and optimised cooling.

Ideal for construction applications including roofing, framing, truss building, sheathing, fencing, crate assembly and cable drums, the new tool will accept standard or double sized fuel cells. The system comes complete with powerful battery and charger (with a charging time of 1 ½ - 2 hours. The lightweight, robust and service friendly tool exceeds the requirements regarding the latest noise legislation.

The fuel cells have an unlimited shelf life, ensuring effective operation over long periods at optimum nail output. It will operate efficiently in temperatures as low as – 10 degrees C, reducing the number of working days lost during harsh weather – an unparalleled feature. It is totally reliable and easy to use. When the fuel cell is empty, no special disposal is required, as it has been constructed of environmentally friendly components and is CFC-free which saves time and money.

The patented connection between the fuel feeder and gas-filled aluminium bag and the leak free metering valve eliminates fuel wastage and ensures gas consumption is low. Clean, fully synthetic oil lubricates the cell, prevents jamming of the piston, extends tool life and reduces maintenance whilst the purified Butane gas reduces the build-up of deposits on tool parts.

UK sales manager of BeA Fastening Systems, Dave Meakin is delighted with the proven high performance of this new product, “In our extensive trials, the Dynamik range has proved a winner on every count and we are sure it will be welcomed by the industry,” he said. “Naturally we are pleased to be able to save our customers money and reduce downtime and also introduce an environmentally friendly product onto the market.”
