

Press Release: 27th July 2005

BeA is Quick off the Mark

As the timber frame market continues to gather momentum, BeA Fastening Systems Limited, the UK's largest supplier of collated industrial fastenings and an innovator when it comes to tool technology, strengthens its tool offering with the introduction of two QuikDrive screw driving systems.

The QD PR0200 G2 is ideal for fastening drywall or plasterboard to wood or steel framing with a variety of screws from 1 ¼" to 2" in length, whilst the QD PR250 G2 has been engineered for the rapid fire of 1 ½" to 2 ½" screws for timber flooring and decking.

The complete systems include a screw driving attachment, extension for stand-up driving and mandrel and are compatible with a range of mains operated or pneumatic drive units.

Designed for quick, easy fastening with tough reliability, the tools boast a multitude of features including precise, self-locking depth control for easily adjustable countersink depth. The QuikLock slip proof coupling is user-friendly and promotes rapid and straightforward assembly and breakdown whilst the adjustable easy grip extension handle provides greater operator comfort. The screws load instantly and are mounted on banana clips which curve away from the material surface making it easier to drive from any angle and help protect fragile surfaces.

An additional feature of the QD PR250 G2 is a non-skid nib and nose contour designed to deliver accurate toenailing with consistent countersink.

“The very nature of the timber industry calls for tough, reliable and versatile tools that are easy to operate,” explains Dave Meakin, UK sales manager.

“The fact that both systems come with an extension means that the tools are ideal for a series of applications, particularly ceilings and flooring.”

BeA Fastening Systems Limited is at the forefront of fastening applications, with a comprehensive range of products that are lightweight, accurate, easy-to-use, reliable, weight balanced around the trigger, not to mention easy-to-load. The company is renowned when it comes to product performance and longevity.

For literature and pricing information on the complete range of equipment and materials available from BeA contact the sales office on 0800 0935154 or log onto www.bea.uk.com for further details.
