

**PRESS RELEASE: 11<sup>TH</sup> MARCH 2005**

**BeA HITS OUT WITH LAUNCH OF NEW NAILERS**

BeA Fastening Systems Limited, one of Europe's leading suppliers of a unique range of high quality fastening systems, launches two pneumatic round head strip nailers. Engineered specifically for the timber market, the R90 845 and R100 952 nailers are the perfect solution for case, pallet, packaging, roof boarding, roof batten applications and first fix joinery.

Committed to ensuring the safety of operators, the tools, weighing only 3.65kg are among the lightest 100mm round head strip nailers available on the market and have been designed to meet current vibration and noise legislation.

Both tools have a responsive top loader magazine, ideal for rapid and straightforward reloading and will accept nails in lengths from 60mm up to 90mm or 100mm with 2.8mm to 3.4mm shank diameters and offer fast fixing rates.

The most advanced features of the nailers are the compact, robust design as well as the high penetration power. With the option of contact or sequential operation and dry fire control, both tools benefit from adjustable direction exhaust and drive depth.

Both the auto tools have been developed with ease of operation in mind. They have been ergonomically designed, making full use of modern materials such as alloys and reinforced nylons to redistribute and balance tool weight around the trigger and the low temperature insulating grip makes them very user friendly nailers. The high efficiency at low air consumption promotes energy saving.

“The manufacturing industry is highly competitive and, as a result, buyers and production managers are constantly on the lookout for innovative products that are reliable and offer a secure fastening solution which will also reduce downtime and increase productivity,” explained Dave Meakin UK sales manager. “That is why at BeA we constantly strive to improve and add to our product range so that we can present effective fastening solutions.”

BeA Fastening Systems Limited is at the forefront of fastening application and has a substantial track record when it comes to performance, product longevity and customer support. For literature and pricing information on the complete range of equipment and materials available from BeA contact the sales office on 0800 0935154.
