

**PREVIEW RELEASE: INTERBUILD 2006**  
**HALL 20: STAND J18 / K19: 23<sup>RD</sup> – 27<sup>TH</sup> APRIL**  
**BeA FASTENING SYSTEMS LIMITED**

BeA Fastening Systems Limited, the UK's largest supplier of collated industrial fastenings, will be showcasing its latest portfolio of innovative products and fastening solutions for the timber frame, housebuilder and construction market at this year's Interbuild.

The show will provide the perfect backdrop to launch the new dynamic range of gas-fuelled systems for timber, concrete and steel fixings. With the capacity to hold a staggering 30% more gas than other leading brands, BeA's fuel cell fastening systems have the power to deliver a third more nails providing you with unbeatable value and massive savings.

The Dynamik D 90 cordless Nailer for timber fixing boasts an extra long magazine to accommodate up to 97 D-head nails, has a durable steel nose is powered by a long life battery, has a comfortable rubber hand grip, battery-independent ignition and optimised cooling.

Ideal for construction applications including roofing, framing, truss building, sheathing, fencing, crate assembly and cable drums, the new tool will accept standard or double sized fuel cells. The fuel cells have an unlimited shelf life, ensuring effective operation over long periods at optimum nail output.

Also on show will be the 246 Wide Crown Stapler - a powerful tool ideal for heavy-duty wood construction insulation work, due to its capacity to accept 27mm wide staples in lengths ranging from 75mm to 150mm. The lightweight, compact double-handled tool can be used onsite or in plant for facades, wall coverings and the

attachment of wood fibre insulation boards to wooden frames. The top-loading tool has a magazine capacity of up to 120 staples and a depth adjustment facility which ensures precision stapling, even when countersinking is required.

A screwdriver for dry wall applications and a selection of steel fasteners will also be unveiled.

BeA will also exhibit a range of state-of-the-art modular self reload tools which have holding capacities of up to 10,000 fasteners. Specifically designed for automated or mounted high volume stapling and nailing applications, the tools have an exceptional fast rate of firing – up to 12 fasteners per second and are capable of accepting staples and nails in lengths 6 – 160mm.

“In addition to the new products, visitors to the stand will also be able to view first hand our range of pneumatic air tools which are capable of inserting fasteners including staples, nails, brads, pins, corrays, clips and specialist fasteners at staggering rates of up to 12 per second,” commented Dave Meakin, UK Sales Manager.
