

THE POWER OF FASTENING

BeA Australia

# YOUR TRUSTED FASTENING PARTNER

## About Joh. Friedrich Behrens AG Germany

The company Joh. Friedrich Behrens was founded in 1910 in Hamburg, Germany. In more than 100 years of its existence it has developed into a global group with a total turnover of approx. 110 million €, achieving market leadership throughout Europe in the fastening technology field.

The BeA trademark stands for top of the range products in the fastening technology field. BeA pneumatic nail guns and fasteners are characterized by top quality and reliability. In order to maintain these high standards in the future, BeA is constantly optimizing and expanding the fastener and tool product range. By using innovative technologies, BeA sets the standards in fastening technology.

## Tool manufacturing in Germany – Continuous improvement – Highest quality standards

Experts in the BeA engineering department in Germany strive to improve efficiency on a daily basis. Once a product is prototyped, our design engineers conduct tests with regards to noise, speed, vibration and pressure. There is even a climate chamber at BeA so that every new device can undergo long term testing for maximum reliability under extreme conditions. BeA produces approx. 75 000 hand held tools and around 1200 Autotec tools per year. BeA tools comply with the most recent industry standards such as ISO 9001 and ISO 9002 to ensure the highest possible quality standards are met.

## Many different applications – Ideal solutions – one supplier

### Get supplied from one source

- High quality standard
- Certified products
- Expert consultation on site
- Optimal and custom made solutions
- Stringent quality management

THE POWER OF FASTENING

## Over 50 years dedicated to the success of Australian manufacturing

BeA products and services are well known and highly regarded by our customers in Australia for over 50 years. With the acquisition of Active Fasteners Pty Ltd, the exclusive BeA distributor in Australia since 1993, BeA is dedicated to provide the Australian Manufacturing and Timber Frame industry with the fastening technology needed in order to grow their business.

## Australia's trusted choice for fastening solutions

BeA is one of Europe's largest and most respected fastening companies. Our range of fully automated, semi-automatic and manual fastening systems has become the trusted choice for market leading businesses in a wide range of industries and sectors. These include:

- Off-site construction and timber frame engineering
- General building
- Roofing
- Furniture and bed manufacturing
- Window production
- Pallet and case manufacturing/ refurbishment
- Automotive
- Industrial applications

THE POWER OF FASTENING

## A wide choice of high quality products

BeA offers an extensive choice of fastening products unmatched by any other manufacturer. Our wide range of products, which are sold under both the BeA and KMR brands, includes:

- Market leading, fully automated fastening systems
- Coil nailers
- Strip nailers
- Gas nailers
- Staplers and staple tools
- Industrial screwdrivers
- A complete range of fasteners including nails, staples and screws
- Hot melt technology

## BeA AUTOTEC

### Solutions for automated and stationary fastening applications

One of the biggest challenges in automating stapling and nailing processes is to overcome the bottleneck that is created by using modified hand held tools.

Fastening speed, load volume and system integration are all concerns. BeA Autotec tools eliminate these challenges by offering a German made system of customized high load, high speed tools with full PLC integration.

Customers in a wide range of industries such as prefab housing, furniture, packaging, automotive, cabinets and even foundries have implemented BeA Autotec tools. From single units to fully automated lines, customers and machine builders have benefited from:

- Highest product quality with minimal order precise manufacturing tolerances
- Wide variety of modules and customization options
- Process reliability due to full PLC integration
- Longevity with long term availability of parts
